

Thank You for investing in The Bible Book-By-Book!

The Teacher and Student guides come in Word and PDF formats. If you choose, you can edit the Word documents to your liking. You are also free to edit the accompanying PowerPoint files.

You can use this dynamic material in one of two ways:

- 1) Teach it in a classroom setting.
- 2) Let the student teach him/herself

To Teach in a Classroom setting simply print out the Teacher's Guide for either the Old or New Testament, and a Student's Guide for each student in your class. You can either print out the entire Student's Guide or just print one lesson at a time as needed. Another option is to give each Student a copy of the digital file and let him/her print it out at home.

The file folders (as shown below) **Old_Testament_Kit** and **New_Testament_Kit** contain the Teacher and Student Guides for the classroom setting. They also contain the Certificate for those students who complete the class, as well as the Grading Sheet and accompanying PowerPoint files for each lesson.

Instructions on grading are included in the Teacher Guide. We recommend having class once per week if at all possible. This way the material stays fresh in both the Teacher's and Student's minds. We cannot emphasize enough the need for the student to do the required reading *prior* to each session.

For the second option, having the student teach him/herself through self study, simply open the folder **Old_Testament_Self-Study_Kit** or **New_Testament_Self-Study_Kit** as shown below.

In these folders are the Student's Self-Study guides as well as the Certificate for those who complete the course. The student will read a chapter for each lesson, as well as the required readings and bonus readings, just like the student in the classroom setting does. The student guide contains a grading sheet and the student will grade him/herself on the honor system and turn in that sheet when completed to receive a certificate. It is recommended that you touch base on a regular basis with self-study students to encourage them, answer any questions they might have, etc....

Inside the Bonus Bible Charts folder (see below) are charts with an overview of every book of the Bible. This is a free resource from <http://www.biblecharts.org> where 100s of charts are available for your use.
